READ SAFETY DIRECTIONS BEFORE OPENING OR USING FOR ANIMAL TREATMENT ONLY

STRIKELAB EXTRA

SPRAY-ON SHEEP BLOWFLY TREATMENT

ACTIVE CONSTITUENT: 65 g/L DICYCLANIL

For the protection for up to 29 weeks against strike by dicyclanil-susceptible strains of blowflies (*Lucilia cuprina*) when applied by spraying on sheep.

For the protection against strike by dicyclanil-susceptible strains of blowflies (*Lucilia cuprina*) during the wound healing process for sheep with mulesing and marking wounds.

×

PASTORAL AG Strikelab Extra Spray-On Sheep Blowfly Treatment contains dicyclanil, a member of the pyrimidine group of chemicals. It is effective against strains of Lucilia cuprina that are sensitive to dicyclanil. It is not as effective against strains of Lucilia cuprina that develop resistance to dicyclanil. Resistance may develop to any chemical

Ask your local veterinary practitioner or animal health adviser for recommended parasite management practices for your area to reduce development of resistance. It is advisable that a resistance test be conducted before any parasite treatment is used

- Use only a spray-on applicator gun recommended by the manufacturer Ensure the applicator gun is clean
- Calibrate applicator gun using an accurate
- Ensure all areas to be protected are treated.
- When preventing body strike ensure bands overlap along the midline (Diagram 1).
- When protecting mulesing wounds from fly strike, take special care to treat the wound and the surrounding 25 mm of wool (Diagram 2).
- When protecting marking wounds from fly strike, take special care to treat the wound and surrounding wool (Diagram 3).
- This product is not recommended for treating existing strikes. Use a product registered as a dressing for existing strikes.
- Heavy rain following the application of this product could diminish the period of protection.
- PASTORAL AG Strikelab Extra Spray-On Sheep Blowfly Treatment contains a scourable colouring agent for easy band identification.
- Withholding periods must be observed following application of PASTORAL AG Strikelab Extra Spray-On Sheep Blowfly Treatment for any purpose including after mulesing/marking as finite residues will occur.

General Directions:

PASTORAL AG Strikelab Extra Spray-On Sheep Blowfly Treatment provides season long protection to sheep against body, breech and poll strike for up to 29 weeks and may be used on sheep with any length wool from 4 weeks after shearing.

PASTORAL AG Strikelab Extra Spray-On Sheep Blowfly Treatment also protects mulesing and marking wounds on lambs against fly strike during the wound healing process. The dose volume is determined by the weight of sheep being treated. Apply PASTORAL AG Strikelab Extra Spray-On Sheep Blowfly Treatment according to the diagrams and tables in the Directions for Use Apply directly from the container or an appropriate back pack using a spray-on applicator gun recommended by the manufacturer. PASTORAL AG Strikelab Extra Spray-On Sheep Blowfly Treatment may be applied to all breeds of sheep to obtain protection against fly strike. PASTORAL AG Strikelab Extra Spray-Ón Sheep Blowfly Treatment is applied as a low-volume treatment onto areas where protection is required. When applying PASTORAL AG Strikelab Extra Spray-On Sheep Blowfly Treatment, the nozzle of the applicator gun should be high enough above the fleece (approximately 15-25 cm), to achieve a 15 cm wide band at each pass for protection from body strike. For treatment of mulesing wounds, the band must be wide enough to cover the wound and 25 mm onto the surrounding wool.

The product should not be applied during gusty or windy weather as spray drift may reduce the

period of protection. It is good agricultural practice for mulesing/marking to be carried out at times of minimal fly activity. Reduced efficacy may occur in sheep affected with dermatophilosis. Significant soiling with dags, mud, dust or urine may reduce efficacy. Where significant dags are present, a light crutching is recommended prior to treatment. Protection period may be reduced if sheep scour heavily following application.

Not to be mixed with any other product. Not to be diluted.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS **AUTHORISED UNDER APPROPRIATE LEGISLATION**

WITHHOLDING PERIODS

MEAT: DO NOT USE less than 14 days before slaughter for human consumption. MILK: DO NOT USE on ewes which are producing or may in the future produce milk that may be used or processed for human consumption.

WOOL: DO NOT USE less than 3 months before shearing or fibre collection.

TRADE ADVICE - EXPORT SLAUGHTER INTERVAL (ESI)

DO NOT USE less than 9 weeks before slaughter for export. Before using this product, confirm the current ESI from the distributor on (03) 5820 8444 or the APVMA website (www.apvma.gov.au/residues).

Use of this product may result in wool residues that may not comply with European Union environmental quality standards. Wool treated with this product may contain detectable residues; adequate treatment records should be kept and made available, if requested by wool buyers.

SAFETY DIRECTIONS

May irritate eyes and skin. Avoid contact with eyes and skin. When opening the container and using the product, wear elbow-length rubber gloves. Wash hands after use. FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26. ADDITIONAL USER SAFETY INFORMATION

Sheep Rehandling Interval: After treatment wait until sheep are dry before rehandling. Additional information is listed in the safety data sheet.

ENVIRONMENTAL PROTECTION

Do not contaminate dams, rivers, streams or other waterways with the chemical or used container. DISPOSAL

Triple-rinse container and dispose of rinsate in compliance with relevant local, state or territory government regulations. Do not dispose of undiluted chemicals on-site. If recycling, replace cap and return clean container to recycler or designated collection point. If the container has the drumMUSTER logo visible, and has been thoroughly cleaned and dried, and is free of any visible residues, it can be recycled at any drumMUSTER collection or similar container management program site. The cap should not be replaced, but may be recycled separately with the container. If not recycling, break, crush, or puncture container and deliver to an approved waste management facility. If an approved waste management facility is not available, bury the broken, crushed or punctured containers 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

STORAGE

Store below 30°C (room temperature). Do not freeze. Protect from light. Store in original container tightly closed in a dry, cool place.

3082, ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S., PG III

Very toxic to aquatic life with long lasting effects.

Do not get in eyes, on skin, or on clothing. Wash contacted areas thoroughly after

IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Collect spillage.

In case of fire, use carbon dioxide, dry chemical, foam. Alcohol resistant foam is the preferred firefighting medium but, if it is not available, normal foam can be used. Store locked up and in a well-ventilated place. Keep co'ol.
